
a short report on

Books Studio

created by

Muhammad Huzaifa Inshal

The following project was created as a personal project. The frontend of the project was built by plain HTML, CSS, JavaScript in Webflow. The backend of the project was created using Django.

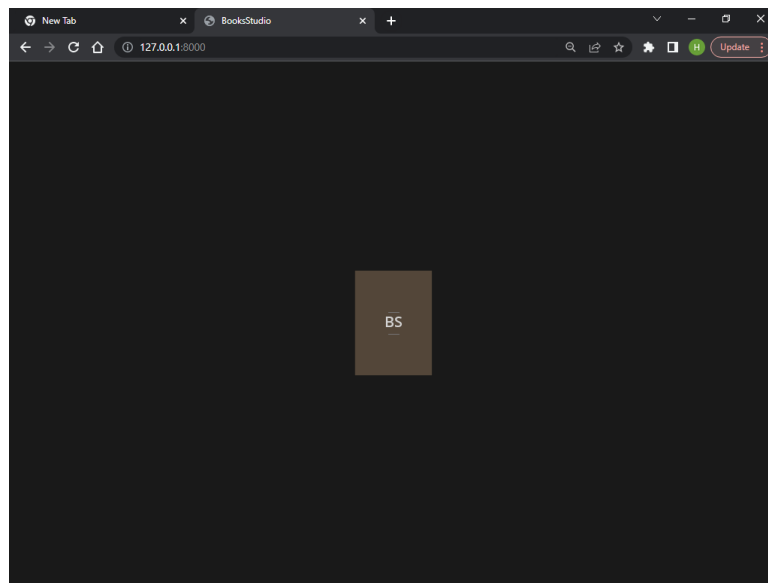

DATABASE

The app features a total of 3 data classes:

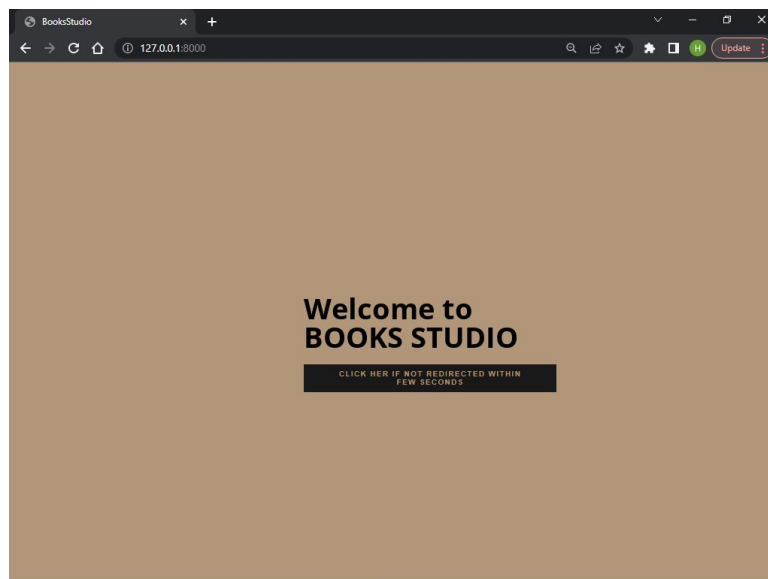

- For storing User info; built using Django default user class,
- For storing Books uploaded by user,
- For storing Music uploaded by user

FLOW OF THE PROGRAM

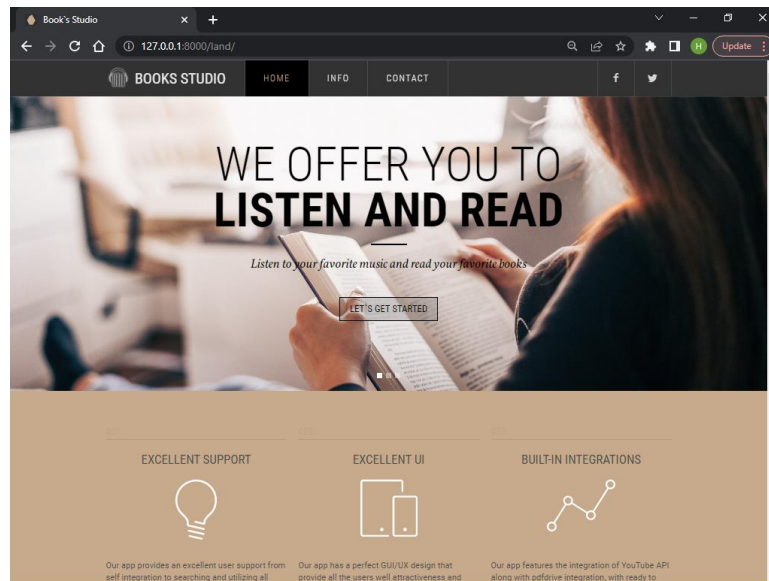

At first the user is welcomed by an animated splash screen, later is taken to the main Landing Page.
